**Garagemaid**

What better way to tackle organizing your garage than with the most innovative system on the market! We are proud to introduce **Garagemaid**.

Clever interlocking connections have been designed into the components, eliminating the need for frustrating fasteners and small parts. These connecting features provide substantial stability in the unit, yet cut the assembly and installation time dramatically — the components assemble as quickly as you can connect them! Once assembled, the unit then attaches to studs in the garage wall, making it a solid and permanent solution for your garage organization needs.

Product material is a High Density Polyethylene, which is ideal for a garage atmosphere. Material is virtually indestructible and will never rust, rot, crack or require painting! This material is also unaffected by the household chemicals typically stored in the garage. Product is substantially stronger than the majority of plastic, wire or wood systems in this category. We stand by this with our 10 year warranty!

Last, but not least, is the modular aspect of the Garagemaid system. Kits and available accessories are designed to be combined in a vast number of configurations allowing you to design the ideal layout for your garage.

No matter how large or small the project, Garagemaid is the ultimate choice!
