

Pool Alarm

Enjoy the fun of your backyard pool without worrying about unexpected intrusions. With the First Alert Pool Alarm know in mere seconds when a child falls in so you can react in time.

The patented technology inside the First Alert Pool Alarm System utilizes passive-sonar intrusion detection to alert you within seconds when a child falls into an unsupervised swimming pool. It includes a small wireless receiver that can be mounted in the home.

Product features:

- Award winning intrusion detection technology triggers alarm within 5 seconds
- 100dB alarm sounds both at poolside and inside your home through RF communication (range up to 350 ft)
- Easy to install – no professional maintenance required
- Sleek design blends in with pool
